Datasheet

IL1F10 (Human) Recombinant protein

Catalog Number: P8854

Regulation Status: For research use only (RUO)

Product Description: Human IL1F10 (Q8WWZ1) recombinant protein expressed in *Escherichia Coli*.

Host: *Escherichia coli*

Theoretical MW (kDa): 17

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Lyophilized

Preparation Method: *Escherichia coli* expression system

Purity: > 95% by SDS-PAGE.
> 95% by RP-HPLC.

Activity: As measured by the binding ability in a functional ELISA, immobilized IL1F10 at 1 ug/mL (100 uL/well) can bind rHuIL-1 Rrp2/Fc Chimera with a linear range of 0.15 - 5 ug/mL.

Storage Buffer: Lyophilized from 20mM Phosphate buffer, pH 7.4

Storage Instruction: Lyophilized although stable at room temperature for 3 weeks. should be stored desiccated below -20°C. Upon reconstitution should be stored at 4°C between 2-7 days and for future use below -20°C.
Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 84639

Gene Symbol: IL1F10

Gene Alias: FIL1-theta, FKSG75, IL-1HY2, IL1-theta, MGC119831, MGC119832, MGC119833

Gene Summary: The protein encoded by this gene is a member of the interleukin 1 cytokine family. This gene

and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. This cytokine is thought to participate in a network of interleukin 1 family members to regulate adapted and innate immune responses. Two alternatively spliced transcript variants encoding the same protein have been reported. [provided by RefSeq]
