Entrez GeneID: 84639

Gene Symbol: IL1F10

Gene Alias: FIL1-theta, FKSG75, IL-1HY2, IL1-theta, MGC119831, MGC119832, MGC119833

Gene Summary: The protein encoded by this gene is a

member of the interleukin 1 cytokine family. This gene and eight other interleukin 1 family genes form a cytokine gene cluster on chromosome 2. This cytokine is thought to participate in a network of interleukin 1 family members to regulate adapted and innate immune responses. Two alternatively spliced transcript variants encoding the same protein have been reported. [provided by RefSeq]
