Datasheet

CD96 (Human) Recombinant Protein

Catalog Number: P9778

Regulation Status: For research use only (RUO)

Product Description: Human CD96 (P40200-2, Val22-Met503) partial recombinant protein with His tag at C-Terminus expressed in HEK293 cells.

Sequence: Val22-Met503

Host: Human

Theoretical MW (kDa): 54.7

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Lyophilized

Preparation Method: Mammalian cell (HEK293) expression system

Recommend Usage: Biological Activity

ELISA

SPR

SDS-PAGE

The optimal working dilution should be determined by the end user.

Storage Buffer: Lyophilized from sterile distilled Water
is > 100 ug/mL

Storage Instruction: Store at 2°C to 8°C for 1 week.

For long term storage, aliquot and store at -20°C to -80°C.

Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 10225

Gene Symbol: CD96

Gene Alias: DKFZp667E2122, MGC22596, TACTILE

Gene Summary: The protein encoded by this gene belongs to the immunoglobulin superfamily. It is a type I membrane protein. The protein may play a role in the adhesive interactions of activated T and NK cells during

the late phase of the immune response. It may also function in antigen presentation. Alternative splicing occurs at this locus and two transcript variants encoding distinct isoforms have been identified. [provided by RefSeq]
