## Datasheet

### PRKAA2 recombinant monoclonal antibody, clone R06-9C7

**Catalog Number:** RAB01657

**Regulatory Status:** For research use only (RUO)

**Product Description:** Rabbit recombinant monoclonal antibody raised against human AMPK alpha 2.

**Clone Name:** R06-9C7

**Immunogen:** Original antibody is raised against recombinant protein corresponding to human AMPK alpha 2

**Theoretical MW (kDa):** Calculated MW: 62 kD

**Antibody Species:** Rabbit

**Protocols:** See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

**Form:** Liquid

**Purification:** Affinity purification

**Isotype:** IgG

**Recommend Usage:** Immunoprecipitation (1:20)

Western Blot (1:500-1:1,000)

The optimal working dilution should be determined by the end user.

**Storage Buffer:** In 50 mM Tris-Glycine, pH 7.4 (0.15 M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% BSA)

**Storage Instruction:** Store at 4°C for short term. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

**Entrez GeneID:** 5563

**Gene Symbol:** PRKAA2

**Gene Alias:** AMPK, AMPK2, PRKAA

**Gene Summary:** The protein encoded by this gene is a

catalytic subunit of the AMP-activated protein kinase (AMPK). AMPK is a heterotrimer consisting of an alpha catalytic subunit, and non-catalytic beta and gamma subunits. AMPK is an important energy-sensing enzyme that monitors cellular energy status. In response to cellular metabolic stresses, AMPK is activated, and thus phosphorylates and inactivates acetyl-CoA carboxylase (ACC) and beta-hydroxy beta-methylglutaryl-CoA reductase (HMGCR), key enzymes involved in regulating de novo biosynthesis of fatty acid and cholesterol. Studies of the mouse counterpart suggest that this catalytic subunit may control whole-body insulin sensitivity and is necessary for maintaining myocardial energy homeostasis during ischemia.
