## Datasheet

### **SMAD1 (phospho Ser463/Ser465) recombinant monoclonal antibody, clone R07-4A3**

**Catalog Number:** RAB01776

**Regulatory Status:** For research use only (RUO)

**Product Description:** Rabbit recombinant monoclonal antibody raised against human SMAD1.

**Clone Name:** R07-4A3

**Immunogen:** Original antibody is raised against a synthetic phosphopeptide corresponding to residues surrounding Ser463/Ser465 of human SMAD1.

**Theoretical MW (kDa):** Calculated MW: 52 kD

**Antibody Species:** Rabbit

**Protocols:** See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

**Form:** Liquid

**Purification:** Affinity purification

**Isotype:** IgG

**Recommend Usage:** Immunoprecipitation (1/20)

Western Blot (1/500-1/1000)

The optimal working dilution should be determined by the end user.

**Storage Buffer:** In 50 mM Tris-Glycine pH 7.4 (0.15 M NaCl, 40% Glycerol, 0.01% Sodium azide and 0.05% BSA)

**Storage Instruction:** Store at -20 °C.

Aliquot to avoid repeated freezing and thawing.

**Entrez GeneID:** 4086

**Gene Symbol:** SMAD1

**Gene Alias:** BSP1, JV4-1, JV41, MADH1, MADR1

**Gene Summary:** The protein encoded by this gene

belongs to the SMAD, a family of proteins similar to the gene products of the Drosophila gene 'mothers against decapentaplegic' (Mad) and the C. elegans gene Sma. SMAD proteins are signal transducers and transcriptional modulators that mediate multiple signaling pathways. This protein mediates the signals of the bone morphogenetic proteins (BMPs), which are involved in a range of biological activities including cell growth, apoptosis, morphogenesis, development and immune responses. In response to BMP ligands, this protein can be phosphorylated and activated by the BMP receptor kinase. The phosphorylated form of this protein forms a complex with SMAD4, which is important for its function in the transcription regulation. This protein is a target for SMAD-specific E3 ubiquitin ligases, such as SMURF1 and SMURF2, and undergoes ubiquitination and proteasome-mediated degradation. Alternatively spliced transcript variants encoding the same protein have been observed. [provided by RefSeq]
