Entrez GeneID: 7448

Gene Symbol: VTN

Gene Alias: V75, VN, VNT

Gene Summary: The protein encoded by this gene is a member of the pexin family. It is found in serum and

tissues and promotes cell adhesion and spreading, inhibits the membrane-damaging effect of the terminal cytolytic complement pathway, and binds to several serpin serine protease inhibitors. It is a secreted protein and exists in either a single chain form or a clipped, two chain form held together by a disulfide bond. [provided by RefSeq]
