Entrez GeneID: 55801

Gene Symbol: IL26

Gene Alias: AK155, IL-26

Gene Summary: This gene was identified by its

overexpression specifically in herpesvirus samimiri-transformed T cells. The encoded protein is a member of the IL10 family of cytokines. It is a secreted protein and may function as a homodimer. This protein is thought to contribute to the transformed phenotype of T cells after infection by herpesvirus samimiri. [provided by RefSeq]
