## Datasheet

### MAPK8 recombinant monoclonal antibody, clone SAPKT183Y185-A11 (FITC)

Catalog Number: RAB03051

Regulatory Status: For research use only (RUO)

**Product Description:** Rabbit recombinant monoclonal antibody raised against human MAPK8.

Clone Name: SAPKT183Y185-A11

**Immunogen:** A synthetic phospho-peptide corresponding to residues surrounding Thr183/Tyr185 of human phospho SAPK/JNK

Antibody Species: Rabbit

**Protocols:** See our web site at http://www.abnova.com/support/protocols.asp or product page for detailed protocols

Form: Liquid

Conjugation: FITC

**Purification:** Protein A purification, Protein G purification

Isotype: IgG

**Recommend Usage:** Flow Cytometry The optimal working dilution should be determined by the end user.

Storage Buffer: 1X PBS, 0.09% Sodium azide, 0.2% BSA

Storage Instruction: Store at 4°C. Do not freeze.

Entrez GenelD: 5599

Gene Symbol: MAPK8

Gene Alias: JNK, JNK1, JNK1A2, JNK21B1/2, PRKM8, SAPK1

**Gene Summary:** The protein encoded by this gene is a member of the MAP kinase family. MAP kinases act as

an integration point for multiple biochemical signals, and are involved in a wide variety of cellular processes such as proliferation, differentiation, transcription regulation and development. This kinase is activated by various cell stimuli, and targets specific transcription factors, and thus mediates immediate-early gene expression in response to cell stimuli. The activation of this kinase by tumor-necrosis factor alpha (TNF-alpha) is found to be required for TNF-alpha induced apoptosis. This kinase is also involved in UV radiation induced apoptosis, which is thought to be related to cytochrom c-mediated cell death pathway. Studies of the mouse counterpart of this gene suggested that this kinase play a key role in T cell proliferation, and differentiation. Four apoptosis alternatively spliced transcript variants encoding distinct isoforms have been reported. [provided by RefSeq]
