#### **Datasheet**

# CD40 recombinant monoclonal antibody, clone G28.5

Catalog Number: RAB03270

Regulatory Status: For research use only (RUO)

Product Description: Mouse recombinant monoclonal

antibody raised against human CD40.

Clone Name: G28.5

**Immunogen:** Original antibody is raised against human erythrocyte-rosette-negative tonsillar lymphocytes.

Antibody Species: Mouse

Protocols: See our web site at

http://www.abnova.com/support/protocols.asp or product

page for detailed protocols

Form: Liquid

Isotype: IgG1 kappa

**Recommend Usage:** Flow Cytometry

Immunohistochemistry Immunoprecipitation

The optimal working dilution should be determined by

the end user.

Storage Buffer: In PBS (0.02% Proclin 300)

Storage Instruction: Store at 4°C for 3 months. For

long term storage store at -20°C.

Aliquot to avoid repeated freezing and thawing.

Entrez GenelD: 958

Gene Symbol: CD40

Gene Alias: Bp50, CDW40, MGC9013, TNFRSF5, p50

**Gene Summary:** The protein encoded by this gene is a member of the TNF-receptor superfamily. This receptor has been found to be essential in mediating a broad variety of immune and inflammatory responses including T cell-dependent immunoglobulin class switching, memory B cell development, and germinal center formation. AT-hook transcription factor AKNA is reported

to coordinately regulate the expression of this receptor and its ligand, which may be important for homotypic cell interactions. Adaptor protein TNFR2 interacts with this receptor and serves as a mediator of the signal transduction. The interaction of this receptor and its ligand is found to be necessary for amyloid-beta-induced microglial activation, and thus is thought to be an early event in Alzheimer disease pathogenesis. Two alternatively spliced transcript variants of this gene encoding distinct isoforms have been reported. [provided by RefSeq]
