## Datasheet

### CD81 recombinant monoclonal antibody, clone 1D6

**Catalog Number:** RAB03347

**Regulatory Status:** For research use only (RUO)

**Product Description:** Rabbit recombinant monoclonal antibody raised against human CD81.

**Clone Name:** 1D6

**Immunogen:** Original antibody is raised against 5A6-aggregated OCI-LY8 B cells.

**Antibody Species:** Rabbit

**Protocols:** See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

**Form:** Liquid

**Conjugation:** Unconjugated

**Concentration:** batch dependent

**Isotype:** IgG, kappa

**Recommend Usage:** ELISA

Flow Cytometry

Functional Study

Immunocytochemistry

Immunofluorescence

Immunohistochemistry (Formalin/PFA-fixed paraffin-embedded sections)

Immunoprecipitation

Western Blot

The optimal working dilution should be determined by the end user.

**Storage Buffer:** In PBS with 0.02% Proclin 300

**Storage Instruction:** Store at 4°C for up to 3 months.

For longer storage, aliquot and store at -20°C.

Aliquot to avoid repeated freezing and thawing.

**Entrez GeneID:** 975

**Gene Symbol:** CD81

**Gene Alias:** S5.7, TAPA1, TSPAN28

**Gene Summary:** The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. This encoded protein is a cell surface glycoprotein that is known to complex with integrins. This protein appears to promote muscle cell fusion and support myotube maintenance. Also it may be involved in signal transduction. This gene is localized in the tumor-suppressor gene region and thus it is a candidate gene for malignancies. [provided by RefSeq]
