Datasheet

IL9 recombinant monoclonal antibody, clone MH9A4

Catalog Number: RAB03599

Regulatory Status: For research use only (RUO)

Product Description: Mouse recombinant monoclonal antibody raised against human IL9.

Clone Name: MH9A4

Immunogen: Original antibody is raised against human IL9 coupled to ovalbumin.

Antibody Species: Mouse

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Isotype: IgG2b kappa

Recommend Usage: ELISA

Flow Cytometry

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS (0.02% Proclin 300)

Storage Instruction: Store at 4°C for 3 months. For long term storage, aliquot and store at -20°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 3578

Gene Symbol: IL9

Gene Alias: HP40, IL-9, P40

Gene Summary: The protein encoded by this gene is a cytokine that acts as a regulator of a variety of hematopoietic cells. This cytokine stimulates cell proliferation and prevents apoptosis. It functions through the interleukin 9 receptor (IL9R), which activates different signal transducer and activator (STAT) proteins and thus connects this cytokine to various biological processes. The gene encoding this cytokine has been

identified as a candidate gene for asthma. Genetic studies on a mouse model of asthma demonstrated that this cytokine is a determining factor in the pathogenesis of bronchial hyperresponsiveness. [provided by RefSeq]
