Datasheet

PDCD1 recombinant monoclonal antibody, clone F1-2A8

Catalog Number: RAB03744

Regulatory Status: For research use only (RUO)

Product Description: Llama recombinant monoclonal antibody raised against synthetic peptide corresponding to amino acids 25 - 167 of human PD-1.

Clone Name: F1-2A8

Immunogen: Original antibody is raised against a synthetic peptide corresponding to amino acids 25 - 167 of human PD-1

Antibody Species: Llama

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Conjugation: Unconjugated

Purification: affinity chromatography

Concentration: 1 mg/mL

Isotype: sdAb

Recommend Usage: ELISA (10 μ g/ml)
Flow cytometry (10 μ g/ml)
The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS

Storage Instruction: Store in working aliquots at -20°C for 1 year.
Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 5133

Gene Symbol: PDCD1

Gene Alias: CD279, PD1, SLEB2, hPD-1, hPD-I

Gene Summary: This gene encodes a cell surface membrane protein of the immunoglobulin superfamily. This protein is expressed in pro-B-cells and is thought to play a role in their differentiation. In mice, expression of this gene is induced in the thymus when anti-CD3 antibodies are injected and large numbers of thymocytes undergo apoptosis. Mice deficient for this gene bred on a BALB/c background developed dilated cardiomyopathy and died from congestive heart failure. These studies suggest that this gene product may also be important in T cell function and contribute to the prevention of autoimmune diseases. [provided by RefSeq]
