Datasheet

TF recombinant monoclonal antibody, clone TW4.20

Catalog Number: RAB03912

Regulatory Status: For research use only (RUO)

Product Description: Rabbit recombinant monoclonal antibody raised against iron-free purified human transferrin.

Clone Name: TW4.20

Immunogen: Original antibody is raised against recombinant protein corresponding to iron-free purified human transferrin.

Antibody Species: Rabbit

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Isotype: IgG

Recommend Usage: Blocking

ELISA

Flow cytometry

Immunofluorescence

Western Blot

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS (0.02% Proclin 300)

Storage Instruction: Store at 4°C for 3 months. For long term storage store at -20°C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 7018

Gene Symbol: TF

Gene Alias: DKFZp781D0156, PRO1557, PRO2086

Gene Summary: This gene encodes a glycoprotein with an approximate molecular weight of 76.5 kDa. It is thought to have been created as a result of an ancient

gene duplication event that led to generation of homologous C and N-terminal domains each of which binds one ion of ferric iron. The function of this protein is to transport iron from the intestine, reticuloendothelial system, and liver parenchymal cells to all proliferating cells in the body. This protein may also have a physiologic role as granulocyte/pollen-binding protein (GPBP) involved in the removal of certain organic matter and allergens from serum. [provided by RefSeq]
