Datasheet

SRC recombinant monoclonal antibody, clone 21H5

Catalog Number: RAB04355

Regulatory Status: For research use only (RUO)

Product Description: Rabbit recombinant monoclonal antibody raised against human SRC.

Clone Name: 21H5

Immunogen: Original antibody is raised against a synthetic peptide corresponding to human SRC.

Theoretical MW (kDa): Calculated MW: 60, 6

Antibody Species: Rabbit

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Purification: Affinity chromatography

Isotype: IgG

Recommend Usage: ELISA

Flow Cytometry

Immunofluorescence (1:20-1:200)

Western Blot (1:500-1:5000)

The optimal working dilution should be determined by the end user.

Storage Buffer: In PBS, pH7.4 (150mM NaCl, 50% glycerol and 0.02% sodium azide)

Storage Instruction: Store at -20 °C or -80 °C. Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 6714

Gene Symbol: SRC

Gene Alias: ASV, SRC1, c-SRC, p60-Src

Gene Summary: This gene is highly similar to the v-src gene of Rous sarcoma virus. This proto-oncogene may

play a role in the regulation of embryonic development and cell growth. The protein encoded by this gene is a tyrosine-protein kinase whose activity can be inhibited by phosphorylation by c-SRC kinase. Mutations in this gene could be involved in the malignant progression of colon cancer. Two transcript variants encoding the same protein have been found for this gene. [provided by RefSeq]
