Entrez GeneID: 6602

Gene Symbol: SMARCD1

Gene Alias: BAF60A, CRACD1, Rsc6p

Gene Summary: The protein encoded by this gene is a member of the SWI/SNF family of proteins, whose

members display helicase and ATPase activities and which are thought to regulate transcription of certain genes by altering the chromatin structure around those genes. The encoded protein is part of the large ATP-dependent chromatin remodeling complex SNF/SWI and has sequence similarity to the yeast Swp73 protein. Two transcript variants encoding different isoforms have been found for this gene. [provided by RefSeq]
