Entrez GeneID: 6822

Gene Symbol: SULT2A1

Gene Alias: DHEA-ST, DHEAS, HST, ST2, ST2A3, STD, hSTa

Gene Summary: Sulfotransferase enzymes catalyze the sulfate conjugation of many hormones, neurotransmitters, drugs, and xenobiotic compounds. These cytosolic enzymes are different in their tissue distributions and substrate specificities. The gene structure (number and length of exons) is similar among family members. This gene is primarily expressed in liver and adrenal tissues where the encoded protein sulfates steroids and bile acids. [provided by RefSeq]
