Datasheet

RUVBL2 recombinant monoclonal antibody, clone R05-8F9

Catalog Number: RAB06410

Regulatory Status: For research use only (RUO)

Product Description: Rabbit recombinant monoclonal antibody raised against human and mouse RUVBL2.

Clone Name: R05-8F9

Immunogen: Original antibody is raised against protein corresponding to full length human RUVBL2.

Theoretical MW (kDa): Calculated MW: 51 kD

Antibody Species: Rabbit

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Purification: Affinity chromatography

Isotype: IgG

Recommend Usage: Western Blot (1:500-1:1000)
The optimal working dilution should be determined by the end use.

Storage Buffer: In PBS, 150mM NaCl, pH 7.4 (50% glycerol and 0.02% sodium azide)

Storage Instruction: Store at 4°C. For long term storage store at -20°C.
Aliquot to avoid repeated freezing and thawing.

Entrez GeneID: 10856

Gene Symbol: RUVBL2

Gene Alias: CGI-46, ECP51, INO80J, REPTIN, RVB2, TIH2, TIP48, TIP49B

Gene Summary: This gene encodes the second human homologue of the bacterial RuvB gene. Bacterial RuvB protein is a DNA helicase essential for homologous

recombination and DNA double-strand break repair. Functional analysis showed that this gene product has both ATPase and DNA helicase activities. This gene is physically linked to the CGB/LHB gene cluster on chromosome 19q13.3, and is very close (55 nt) to the LHB gene, in the opposite orientation. [provided by RefSeq]
