## Datasheet

### YWHAB recombinant monoclonal antibody, clone 6F6

**Catalog Number:** RAB07561

**Regulatory Status:** For research use only (RUO)

**Product Description:** Rabbit recombinant monoclonal antibody raised against human YWHAB.

**Clone Name:** 6F6

**Immunogen:** Original antibody is raised against a synthetic peptide corresponding to human YWHAB.

**Theoretical MW (kDa):** Calculated MW: 29, 2

**Antibody Species:** Rabbit

**Protocols:** See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

**Form:** Liquid

**Purification:** Affinity chromatography purification

**Isotype:** IgG

**Recommend Usage:** ELISA

Flow Cytometry(1:50-1:200)

Immunofluorescence (1:50-1:200)

Western Blot (1:500-1:2000)

The optimal working dilution should be determined by the end user.

**Storage Buffer:** In PBS, pH7.4 (150 mM NaCl, 0.02% sodium azide and 50% glycerol)

**Storage Instruction:** Store at -20°C or -80°C. Aliquot to avoid repeated freezing and thawing.

**Entrez GeneID:** 7529

**Gene Symbol:** YWHAB

**Gene Alias:** GW128, HS1, KCIP-1

**Gene Summary:** This gene encodes a protein belonging to the 14-3-3 family of proteins, members of which

mediate signal transduction by binding to phosphoserine-containing proteins. This highly conserved protein family is found in both plants and mammals. The encoded protein has been shown to interact with RAF1 and CDC25 phosphatases, suggesting that it may play a role in linking mitogenic signaling and the cell cycle machinery. Two transcript variants, which encode the same protein, have been identified for this gene. [provided by RefSeq]
