Datasheet

PSMA magnetic beads

Catalog Number: U0381

Regulatory Status: For research use only (RUO)

Product Description: PSMA magnetic beads is designed to isolate Prostate specific membrane antigen (PSMA) positive cells from fresh peripheral blood mononuclear cells (PBMC) or other sources by positive selection. The beads bind to cell surface marker via antibody recognizing PSMA, a type II transmembrane protein, express in all forms of prostatic cells. The cells of interest bind to PSMA magnetic beads in a tube and the beads-bound cells are separated by magnet without columns. The isolated cells may be cultured directly or used for downstream molecular analysis.

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Particle Size: 1 μ m in diameter

Storage Buffer: In PBS, pH 7.4 (0.1% BSA, 0.1% Tween 20, and 0.09% sodium azide)

Storage Instruction: Stored at 2-8°C.
