Datasheet

UTP sodium solution

Catalog Number: U0516

Regulation Status: For research use only (RUO)

Product Description: UTP is Uridine-5'-triphosphate, which is an extremely stable nucleotide. This compound and its sodium salt are essential components of energy conversion in biological systems and can be used in various related applications in molecular biology, such as in vitro transcription (IVT), RNA amplification, siRNA synthesis, etc. UTP is also involved in galactose metabolism, in which the activated form of UDP-galactose is converted to UDP-glucose, which enters the glycogen synthesis pathway.

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Concentration: 100 mM

Recommend Usage: In Vitro Transcription
The optimal working dilution should be determined by the end user.

Storage Instruction: Store at -20°C.
Aliquot to avoid repeated freezing and thawing.
