CytoRed solution

Catalog Number: U0552

Regulation Status: For research use only (RUO)

Product Description: CytoRed solution is used for live cell staining. CytoRed is cell membrane permeable and accumulates inside of viable cells as resorufin. CytoRed has a much wider spectrum than BCECF or Calcein, so filters for fluorescein and rhodamine can also be used. The excitation and emission wavelengths of resorufin are 560 nm and 590 nm, respectively.

Regulation Status: For research use only (RUO)

Protocols: See our web site at <http://www.abnova.com/support/protocols.asp> or product page for detailed protocols

Form: Liquid

Storage Instruction: Store at -20°C. Protect from light.
