| Reference | Zhang, Y., (2005) Mol. Cell Proteomics 4 (9), 1240-1250 |
| Description of Target | The specific function of FRK is not yet known. The protein encoded by this gene belongs to the TYR family of protein kinases. This tyrosine kinase is a nuclear protein and may function during G1 and S phase of the cell cycle and suppress growth. |
| Protein Interactions | SF3B4; BNIP2; CSK; HSP90AA1; FYN; KHDRBS1; PTEN; RB1; |
| Reconstitution and Storage | All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding. |
