Product Format	Liquid. Purified antibody supplied in 1x PBS buffer.
Description of Target	RHOB mediates apoptosis in neoplastically transformed cells after DNA damage. RHOB is not essential for development but affects cell adhesion and growth factor signaling in transformed cells. RHOB plays a negative role in tumorigenesis as deletion causes tumor formation. RHOB is involved in intracellular protein trafficking of a number of proteins. RHOB targets PKN1 to endosomes and is involved in trafficking of the EGF receptor from late endosomes to lysosomes. RHOB is also required for stability and nuclear trafficking of AKT1/AKT which promotes endothelial cell survival during vascular development.
Protein Interactions	RAC1; MDM2; UBC; CORO1C; LAMTOR3; ILF2; HNRNPU; TNFAIP1; ELAVL1; ARHGEF3; RHPN2; PPP2CA; ARHGDIG; PDE6D; PGGT1B; FNNTA; CIT;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
