Description of Target	CENPI is involved in the response of gonadal tissues to follicle-stimulating hormone. The gene encoding CENPI is also a potential candidate for human X-linked disorders of gonadal development and gametogenesis. The product of this gene is involved in the response of gonadal tissues to follicle-stimulating hormone. This gene is also a potential candidate for human X-linked disorders of gonadal development and gametogenesis.
Protein Interactions	CENPU; CENPM; CENPN; APP; CENPP; CENPO; CENPH; SUMO2; UBC; CENPA;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
