Reference	Pawlak,G., (2004) Int. J. Cancer 110 (3), 368-373
Description of Target	TMOD2 is a neuronal-specific member of the tropomodulin family of actin-regulatory proteins. It caps the pointed end of actin filaments preventing both elongation and depolymerization. The capping activity of this protein is dependent on its association with tropomyosin.
Protein Interactions	UBC; PAN2; SF3B3; SF3B2; SAFB; ABCC1; APP; TPM3; TPM1;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
