| Product Format | Liquid. Purified antibody supplied in 1x PBS buffer. |
| Description of Target | Traf3ip1 play an inhibitory role on IL13 signaling by binding to IL13RA1. It is involved in suppression of IL13-induced STAT6 phosphorylation, transcriptional activity and DNA-binding. It recruits TRAF3 and DISC1 to the microtubules. |
| Reconstitution and Storage | All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding. |
