Reference	Slagsvold, T., (2006) EMBO J. 25 (16), 3738-3749
Description of Target	The specific function of the protein remains unknown. This gene is a member of the Ser/Thr protein kinase family and encodes a phosphoprotein with a PX (phox homology) domain. The protein phosphorylates several target proteins and has a role in neutral amino acid transport and activation of potassium and chloride channels. Alternate transcriptional splice variants, encoding different isoforms, have been characterized.
Protein Interactions	UBC; NEDD4L; HSP90AA1; GSK3B; APP; ITCH; ESR1; GSK3A; SLC9A3R2; PDPK1;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
