| Description of Target                          | Ras proteins bind GDP/GTP and possess intrinsic GTPase activity. ERAS plays an important role in the tumor-like growth properties of embryonic stem cells.   |
| Protein Interactions                           | PIK3CD; PIK3R1; RAF1; PIK3CG;  |
| Reconstitution and Storage                     | All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding. |
