Product Format	Liquid. Purified antibody supplied in 1x PBS buffer.
Description of Target	FLJ36070 is a transcriptional coactivator. FLJ36070 stimulates the transcriptional activity of MEF2C. FLJ36070 stimulates MYOD1 activity in part via MEF2, resulting in an enhancement of skeletal muscle differentiation.
Protein Interactions	MYOCD; MAMSTR;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
