Description of Target	Rpl17 is a component of the 60S subunit of the ribosome, the organelles that catalyze protein synthesis; member of the L22P family of ribosomal proteins; induced under amino acid deprivation of cells.
Protein Interactions	Park7; Srca;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
