Product Number	ARP56299_P050-FITC
Product Page	www.avivasysbio.com/selenop-antibody-n-terminal-region-fitc-arp56299-p050-fitc.html
Name	SELENOP Antibody - N-terminal region : FITC (ARP56299_P050-FITC)
Protein Size (# AA)	411 amino acids
Molecular Weight	46kDa
Conjugation	FITC: Fluorescein Isothiocyanate
NCBI Gene Id	6414
Host	Rabbit
Clonality	Polyclonal
Concentration	0.5 mg/ml
Gene Full Name	selenoprotein P
Alias Symbols	SeP, SELP, SEPP, SEPP1
Peptide Sequence	Synthetic peptide located within the following region: LGLALALCLLPSGGTESQDQSSLCKOPPAWSIRDQDPMLNSNGSVTVVAL
Product Format	Liquid. Purified antibody supplied in 1x PBS buffer.
Reference	Peters,U., (2008) Cancer Epidemiol. Biomarkers Prev. 17 (5), 1144-1154
Description of Target	This gene encodes a selenoprotein that is predominantly expressed in the liver and secreted into the plasma. This selenoprotein is unique in that it contains multiple selenocysteine (Sec) residues per polypeptide (10 in human), and accounts for most of the selenium in plasma. It has been implicated as an extracellular antioxidant, and in the transport of selenium to extra-hepatic tissues via apolipoprotein E receptor-2 (apoER2). Mice lacking this gene exhibit neurological dysfunction, suggesting its importance in normal brain function. Sec is encoded by the UGA codon, which normally signals translation termination. The 3' UTRs of selenoprotein mRNAs contain a conserved stem-loop structure, designated the Sec insertion sequence (SECIS) element, that is necessary for the recognition of UGA as a Sec codon, rather than as a stop signal. The mRNA for this selenoprotein contains two SECIS elements. Alternatively spliced transcript variants have been found for this gene.
Protein Interactions	EP300; MEOX2; THRA; EGFR;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
Datasheets/Manuals	Printable datasheet for anti-SELENOP (ARP56299_P050-FITC) antibody
Blocking Peptide	For anti-SELENOP (ARP56299_P050-FITC) antibody is Catalog # AAP56299 (Previous Catalog # AAPP35502)
Immunogen	The immunogen is a synthetic peptide directed towards the N terminal region of human SEPP1
Uniprot ID	P49908
Protein Name	selenoprotein P
Sample Type Confirmation	SEPP1 is supported by BioGPS gene expression data to be expressed in HEK293T
Protein Accession #	NP_001087195
Purification	Affinity Purified
Nucleotide Accession #	NM_001093726
Gene Symbol	SELENOP

Predicted Species Reactivity	Human, Horse
Application	WB
Predicted Homology Based on Immunogen Sequence	Horse: 85%; Human: 100%
Image 1	 A schematic diagram of a Y-shaped antibody molecule. It consists of two heavy chains (inner lines) and two light chains (outer lines) joined at their C-termini. The two antigen-binding sites are formed by the variable regions of the light chains.

AVIVA SYSTEMS BIOLOGY manufactures and sells quality antibody products covering genome wide proteins.

This product is for Research Use Only. Not for diagnostic, human, or veterinary use.
Optimal conditions of its use should be determined by end users.
