Product Format	Liquid. Purified antibody supplied in 1x PBS buffer.
Description of Target	Sntg1 is an adapter protein that binds to and probably organizes the subcellular localization of a variety of proteins. It may link various receptors to the actin cytoskeleton and the dystrophin glycoprotein complex. It may participate in regulating the subcellular location of diacylglycerol kinase-zeta to ensure that diacylglycerol is rapidly inactivated following receptor activation.
Protein Interactions	TGFBR1;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
