Product Format	Liquid. Purified antibody supplied in 1x PBS buffer.
Description of Target	RHOF is a plasma membrane-associated small GTPase which cycles between an active GTP-bound and an inactive GDP-bound state. It causes the formation of thin, actin-rich surface projections called filopodia. And it functions cooperatively with CDC42 and Rac to generate additional structures, increasing the diversity of actin-based morphology.
Protein Interactions	ELAVL1; UBC;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
Datasheets/Manuals	Printable datasheet for anti-RHOF (ARP57309_P050-Biotin) antibody
Blocking Peptide	For anti-RHOF (ARP57309_P050-Biotin) antibody is Catalog # AAP57309
