Description of Target	Ift80 is a component of the intraflagellar transport (IFT) complex B, which is essential for the development and maintenance of motile and sensory cilia.
Protein Interactions	Ift88;
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
