It as part of the MLL1/MLL complex it is involved in methylation and dimethylation at 'Lys-4' of histone H3. It may function as a transcriptional regulator. And it May play a role in hematopoiesis.

Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
