Product Format	Liquid. Purified antibody supplied in 1x PBS buffer.
Description of Target	Eif2c3 is required for RNA-mediated gene silencing (RNAi). It binds to short RNAs such as microRNAs (miRNAs) and represses the translation of mRNAs which are complementary to them. It lacks endonuclease activity and does not appear to cleave target mRNAs.
Reconstitution and Storage	All conjugated antibodies should be stored in light-protected vials or covered with a light protecting material (i.e. aluminum foil). Conjugated antibodies are stable for at least 12 months at 4C. If longer storage is desired (24 months), conjugates may be diluted with up to 50% glycerol and stored at -20C to -80C. Freezing and thawing conjugated antibodies will compromise enzyme activity as well as antibody binding.
