Product Number	GWB-5A59EB
Product Page	www.avivasysbio.com/poet-1-transfer-plasmid-10ug.html
Name	pOET-1 transfer plasmid (10ug) (GWB-5A59EB)
Description	<p>pOET1 is a baculovirus transfer vector designed for high level expression of foreign genes under the powerful AcMNPV polyhedron (polh) promoter. The vector is smaller than other available transfer vectors (4541bp) which greatly facilitate the cloning steps. It has a bacterial origin of replication and an ampicillin resistance gene for selection in E. coli. The polh sequences have been replaced by a multiple cloning site containing 14 unique restriction sites for insertion of the foreign gene in the correct orientation. The AcMNPV sequences flanking the gene in the transfer vectors MCS allow recombination with the viral DNA to insert the expression cassette into the polh locus. pOET1 is compatible with any baculovirus system that utilizes homologous recombination in insect cells.</p>
Datasheets/Manuals	Printable datasheet for pOET-1 transfer plasmid (10ug) (GWB-5A59EB)

AVIVA SYSTEMS BIOLOGY manufactures and sells quality antibody products covering genome wide proteins.

This product is for Research Use Only. Not for diagnostic, human, or veterinary use.
Optimal conditions of its use should be determined by end users.
