

# SZABO SCANDIC

Part of Europa Biosite

## Produktinformation

Forschungsprodukte & Biochemikalien

Zellkultur & Verbrauchsmaterial

Diagnostik & molekulare Diagnostik

Laborgeräte & Service

Product Number	OAAU00102
Product Page	<a href="http://www.avivasysbio.com/donkey-anti-sheep-igg-h-l-antibody-oaa00102.html">www.avivasysbio.com/donkey-anti-sheep-igg-h-l-antibody-oaa00102.html</a>
Name	Donkey Anti-Sheep IgG (H&L) Antibody (OAAU00102)
Isotype	IgG
Host	Donkey
Product Format	Affinity purified against Sheep IgG in 10 mM sodium phosphate, 0.15M sodium chloride, 0.05% sodium azide, pH 7.2.
Reconstitution and Storage	4C. As a plate coating antibody for assays that utilize sheep polyclonal antibodies as the primary antibody.
Datasheets/Manuals	Printable datasheet for <a href="#">OAAU00102</a>
Specificity	Based upon IEP this antibody reacts with all sheep IgG heavy (g) and light chains.
Additional Information	<b>Background:</b> Solid phase immunoassay utilizing microtiter plates are the predominant assay format for the detection of low concentration small molecules in biological samples. The primary antibody to these small molecules serves two purposes; it confers specificity for the assay by selectively binding the small molecule, and, in binding it determines the sensitivity of the assay. Small molecule assays require a competitive immunoassay technique where the small molecule antigen binds to a limiting amount of the primary antibody in competition with a labeled reporter small molecule, such as HRP. Primary antibodies can be coated on solid phases but the technique is difficult to reproducibly accomplish, as the dilution of the primary antibody has to be tightly controlled across all of the coated plates and the amounts of primary antibody required can be high. Secondary generic coated plates using donkey anti-sheep IgG antibody coating can be carried out easily and after being blocked and dried these plates are stable for many years. Typical primary antibody titers using coated generic plates can be 10 fold lower than directly coated primary antibodies.
Additional Information	<b>Features:</b> Affinity Purified Antibody to Sheep IgG, (H&L). Extend primary antibody supplies. Supplied as a PBS solution
Application Info	10 ug/mL in diluted Coating Buffer
Immunogen	Highly purified Sheep IgG whole molecule.
Additional Information	<b>Cross Reactivity:</b> Based upon IEP, no reactivity is seen to non-immunoglobulin serum proteins.
Predicted Species Reactivity	Sheep
