Other Applications Data	Since applications vary, you should determine the optimum working dilution of the product that is appropriate for your specific need.
Datasheets/Manuals	Printable datasheet for anti-CD79A (OASB01942) antibody
Specificity	Ig
Additional Information	Description: Pooled antisera from goats hyperimmunized with rabbit IgG; purified by affinity chromatography; reacts with the heavy and light chains of rabbit IgM and IgG; cross-adsorbed against human immunoglobulins and pooled sera for minimal reactivity
Application Info	Direct and indirect immunofluorescent staining, Enzyme-Linked-Immunesorbent-Assay (ELISA), Fluorescent-Linked-Immunesorbent-Assay (FLISA), Immunoblotting, Immunohistochemistry
Immunogen	Rabbit IgG
Warning	Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute azide- containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.
