Other Applications Data	Since applications vary, you should determine the optimum workingdilution of the product that is appropriate for your specific need.
Datasheets/Manuals	Printable datasheet for anti-IGHG1 (OASB02095) antibody
Specificity	IgG(H+L)
Additional Information	Description: Pooled antisera from rabbits hyperimmunized with human IgG; purified by affinity chromatography on human IgG covalently linked to agarose; reacts with the heavy and light chains of human IgG and the light chains of human IgM and IgA
Application Info	Immunofluorescent staining, Enzyme-Linked-Immunesorbent-Assay (ELISA), Western blotting, Dot-and slot-immunoblotting, Immunohistochemistry
Immunogen	Human IgG
Warning	Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin,eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash withcopious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxichydrazoic acid under acidic conditions. Dilute azide- containing compounds in running water before discardingto avoid accumulation of potentially explosive deposits in lead or copper plumbing.
