Product Number	OASB02155
Product Page	<a href="http://www.avivasysbio.com/hamster-igg-h-l-mouse-ads-antibody-oasb02155.html">www.avivasysbio.com/hamster-igg-h-l-mouse-ads-antibody-oasb02155.html</a>
Name	Rabbit Anti-Hamster IgG(H+L) Antibody (OASB02155)
Isotype	IgG
Conjugation	Unconjugated
Host	Rabbit
Clonality	Polyclonal
Concentration	0.5 mg/mL
Gene Full Name	Ig gamma-1 chain C region
Reconstitution and Storage	Store at 2-8C
Storage	<ul style="list-style-type: none"> <li>- The purified (UNLB) antibody is supplied as 0.5 mg purified immunoglobulin in 1.0 mL of 100 mM borate buffered saline, pH 8.2. No preservatives or amine- containing buffer salts added. Store at 2- 8 C</li> <li>- The R- phycoerythrin (R- PE) conjugate is supplied as 0.25 mg in 1.0 mL of PBS/NaN<sub>3</sub> and a stabilizing agent. Store at 2- 8 C. Do not freeze!</li> <li>- Protect conjugated forms from light. Each reagent is stable for the period shown on the bottle label if stored as directed.</li> </ul>
Other Applications Data	Since applications vary, you should determine the optimum working dilution of the product that is appropriate for your specific need.
Datasheets/Manuals	Printable datasheet for <a href="#">Rabbit Anti-Hamster IgG(H+L) Antibody (OASB02155)</a>
Specificity	IgG(H+L)
Additional Information	<b>Description:</b> Pooled antisera from rabbits hyperimmunized with hamster IgG; purified by affinity chromatography on hamster IgG covalently linked to agarose; reacts with the heavy and light chains of Syrian and Armenian hamster IgG; cross-adsorbed against mouse immunoglobulins and pooled sera for minimal reactivity
Application Info	Immunofluorescent staining, Second step reagent for flow cytometry, Enzyme-Linked-Immunesorbent-Assay (ELISA)
Immunogen	Hamster IgG
Warning	Reagents contain sodium azide. Sodium azide is very toxic if ingested or inhaled. Avoid contact with skin, eyes, or clothing. Wear eye or face protection when handling. If skin or eye contact occurs, wash with copious amounts of water. If ingested or inhaled, contact a physician immediately. Sodium azide yields toxic hydrazoic acid under acidic conditions. Dilute azide- containing compounds in running water before discarding to avoid accumulation of potentially explosive deposits in lead or copper plumbing.
Dilution	Immunofluorescence R-PE conjugate 1-2 ug/10 <sup>6</sup> cells Flow cytometry Purified Antibody R-PE conjugate <= 1.0 ug/10 <sup>6</sup> cells <= 0.3 ug/10 <sup>6</sup> cells
Cross Absorption	Minimal cross- reactivity with mouse immunoglobulins
Characterization	To ensure lot- to- lot consistency, each batch of product is tested by ELISA and flow cytometry to conform to characteristics of a standard reference reagent.
Purification	Affinity chromatography on hamster IgG covalently linked to agarose
Tested Species Reactivity	Hamster
Predicted Species Reactivity	Hamster

<b>Application</b>	FC
<b>Image 1</b>	

AVIVA SYSTEMS BIOLOGY manufactures and sells quality antibody products covering genome wide proteins.

This product is for Research Use Only. Not for diagnostic, human, or veterinary use.  
Optimal conditions of its use should be determined by end users.
