Product Number	OORA00240
Product Page	www.avivasysbio.com/elisa-microwell-coating-stabilizer-oora00240.html
Name	ELISA Microwell Coating Stabilizer (OORA00240)
Conjugation	Unconjugated
Concentration	1X
Product Format	Liquid (sterile filtered)
Description of Target	ELISA Microwell Coating Stabilizer is designed to stabilize antigens, antibodies or other ligands after attachment to the surface of microwells for use in ELISA. Stabilizer allows the user to dry and store plates for a minimum of one (1) year without significant loss of signal.
Reconstitution and Storage	2°C to 8°C
Datasheets/Manuals	Printable datasheet for OORA00240 Please click here to view the MSDS.
Additional Information	Buffer: This buffer contains phosphate buffered saline and proprietary reagents to stabilize and preserve ELISA plates. A proprietary combination of stabilizers and preservatives is used that is azide and mercury free.
Additional Information	Label: Unconjugated
Application Info	This product is a "ready-to-use" 1X solution for stabilizing ELISA plates for storage prior to ELISA. After the addition of blocking agent, wash the contents of ELISA microwells and add a sufficient volume of ELISA Microwell Coating Stabilizer to each well of the microplate. Let stand for 30 minutes at room temperature. Aspirate contents of each well and allow the plate to dry. Store appropriately for future use. This buffer contains phosphate buffered saline and proprietary reagents to stabilize and preserve ELISA plates. A proprietary combination of stabilizers and preservatives is used that is azide and mercury free.
Purification	This product was aseptically filtered through a Millipore 0.22 micron filter into clean, pre-sterilized containers. The product was tested on trypticase soy agar for 24 hours, 48 hours and 72 hours and was found to be negative for bacteria.
Application	ELISA

AVIVA SYSTEMS BIOLOGY manufactures and sells quality antibody products covering genome wide proteins.

This product is for Research Use Only. Not for diagnostic, human, or veterinary use.

Optimal conditions of its use should be determined by end users.
