Product Number	OORA01088
Product Page	www.avivasysbio.com/rabbit-blood-defibrinated-ooa01088.html
Name	Rabbit Blood Defibrinated (OORA01088)
Conjugation	Unconjugated
Source	Rabbit - New Zealand White
Alias Symbols	Sterile Rabbit Blood Defibrinated
Product Format	Liquid
Description of Target	Defibrinated rabbit blood is aseptically collected and prepared to order from our colony of animals. Fibrin is mechanically removed during the clotting process without the presence of anticoagulants or other additives. Defibrinated rabbit blood is ideal for blood agar plate preparations. Blood Agar is a general purpose enriched medium often used to grow fastidious organisms and to differentiate bacteria based on their hemolytic properties. Defibrinated rabbit blood is perishable and is collected and processed upon receipt of your order.
Reconstitution and Storage	Store defibrinated Rabbit Blood at 4°C prior to opening. Use standard sterile techniques and sterile equipment at all times to maintain sterility. If properly stored and handled this product MAY be stable for up to two weeks. Be advised that blood is a perishable product and exact shelf may depend on application. This product MAY be stable for up to two (2) weeks if properly stored and handled.
Datasheets/Manuals	Printable datasheet for OORA01088
Additional Information	Sex: Mixed Sterilization: This product was aseptically drawn and processed using sterile equipment and sterile techniques. The product was tested on trypticase soy agar for 24 hours, 48 hours, and 72 hours and was found to be negative for bacteria.
Application Info	All assays should be optimized by the user.
Predicted Species Reactivity	Rabbit
Application	Blood agar plate preparations.

AVIVA SYSTEMS BIOLOGY manufactures and sells quality antibody products covering genome wide proteins.

This product is for Research Use Only. Not for diagnostic, human, or veterinary use.

Optimal conditions of its use should be determined by end users.
