Product Number	OOSA09546
Product Page	www.avivasysbio.com/elisa-wash-buffer-accessory-reagent-oosa09546.html
Name	ELISA WASH BUFFER Accessory Reagent (OOSA09546)
Concentration	10X
Product Format	Liquid. Phosphate buffered saline
Description of Target	10x ELISA WASH BUFFER
Reconstitution and Storage	2°C to 8°C
Datasheets/Manuals	Printable datasheet for ELISA WASH BUFFER Accessory Reagent (OOSA09546)
Protocol Information	<ol style="list-style-type: none"> 1) Dilute the required volume of OOSA09546 1:10 with deionized water (1 part OOSA09546 to 9 parts water) and mix. 2) Use at each ELISA wash step for a total of 2-4 washes. Fill each well with the diluted wash buffer (approximately 400 uL), taking care not to submerge the plate as this can cross-contaminate the wells. The buffer may be dispensed manually or by an automated system. 3) Between washes, aspirate or dump the buffer. After the final wash, blot the plate on paper towels to remove any excess liquid.
Intended Use	<p>ELISA wash buffer was developed as a high performance washing solution for use in ELISA formats. The optimized formulation of pH stabilizers, salts and detergents increases the efficiency of washing stages during ELISA, leading to a reduction in background noise and an increased specific signal.</p> <p>OOSA09546 is compatible with all routinely used conjugate components such as HRP, Avidin, and Alkaline Phosphate.</p>
Application	ELISA

AVIVA SYSTEMS BIOLOGY manufactures and sells quality antibody products covering genome wide proteins.

This product is for Research Use Only. Not for diagnostic, human, or veterinary use.
Optimal conditions of its use should be determined by end users.
