Rabbit IgG Heavy and Light Chain Cross-Adsorbed Antibody

oat Polyclonal Conjugate Biotin ntigen Affinity Purified atalog No. A120–201B ot No. A120–201B–13
atalog No. A120–201B
-
t No. Δ120_2018_13
PPLICATIONS WB, IHC, ICC, ELISA
ECIES REACTIVITY Rabbit. Minimum reactivity to bovine, chicken, horse, human, mouse, pig and rat
MOUNT 1 ml
ONCENTRATION 0.5 mg/ml
ORAGE/SHELF LIFE 2 - 8°C / 1 year from date of receipt
IYSICAL STATE Liquid
JFFER Phosphate Buffered Saline (PBS) containing 0.2% BSA and 0.09% Sodium Azide
OTYPE IgG
RIGIN USA
Antiserum was cross adsorbed using bovine, chicken, horse, human, mouse, pig and rat immunosorbents to remove cross reactive antibodies. The antibody to rabbit IgG was isolated by affinity chromatography using antigen coupled to agarose beads and conjugated to biotin.
Antibody concentration was determined by extinction coefficient: absorbance at 280 nm of 1.4 equals 1.0 mg of IgG. Biotin/antibody protein ratio is 4:1.
By immunoelectrophoresis and ELISA this antibody reacts specifically with rabbit IgG and with light chains common to other rabbit immunoglobulins. No antibody was detected against non-immunoglobulin serum proteins. Less than 1% cross reactivity to bovine, chicken, goat, horse, human, mouse, pig and rat IgG was detected. This antibody may cross react with IgG from other species. Biotinylated antibody was demonstrated by reaction with avidin/peroxidase when coated on microtiter wells. Working dilutions should be determined by the investigator.
PPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.
Western Blot 1:10,000 – 1:200,000
Immunohistochemistry 1:250 – 1:2,500
Immunocytochemistry 1:100 – 1:500
ELISA 1:10,000 - 1:200,000
PLICATION NOTES Not all listed applications have been specifically tested by our laboratory.
