Normal Goat Serum

Goat

Catalog No. A50-001S-1L

AMOUNT	1 L
STORAGE/SHELF LIFE	2 – 8°C / 1 year from date of receipt
PHYSICAL STATE	Liquid
BUFFER	Serum containing 0.09% Sodium Azide
ORIGIN	USA
PRODUCTION PROCEDURES	Goat serum is collected from normal, healthy animals.

APPLICATIONS Centrifuge tube to remove product from lid. Optimal working dilutions should be determined experimentally by the investigator. Prepare working dilution immediately before use.

APPLICATION NOTES Normal goat serum can be used for non-specific blocking of surfaces, tissue, and protein in applications such as IHC, western blot, and ICC. This generally occurs by binding to Fc receptors that could interact with primary or secondary antibodies, thus causing off-target binding, or simply interacting with any other surfaces that may non-specifically bind IgGs.
