Sodium Dodecyl Sulfate (SDS), ultra pure

Catalog No: 51430
Lot No: XXXXX
Cas No: 151-21-3
Formula: C₁₂H₂₅NaO₄S
MW: 288.38
Supplied as: solid
Stability: stable at room temperature

Background

SDS is commonly used in preparing proteins for electrophoresis in SDS-PAGE. This compound works by disrupting non-covalent bonds in the proteins, denaturing them, and causing the molecules to lose their native conformation. This new negative charge is significantly greater than the original charge of that protein. The electrostatic repulsion that is created by binding of SDS causes proteins to unfold into a rod-like shape thereby eliminating differences in shape as a factor for separation in the gel.

Tests

Appearance:
Assay (titr.):
pH (0.1 M; H₂O; 25°C):
Loss on drying:
