RVX-208

Catalog #: 27111

Lot #: 140113

Size: 5 mg

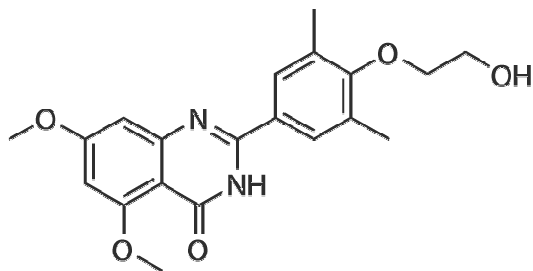

Structure:

CAS Registry #: 1044870-39-4

Purity: ≥98%

Chemical Formula: C₂₀H₂₂N₂O₅

Molecular Weight: 370.4

Description: RVX-028, also known as RVX-000222, is a potent BET bromodomain inhibitor. It preferentially binds to the second bromodomain on BET proteins. It also stimulates apolipoprotein (APO) A1 gene expression, which increases apoA-I and HDL-C *in vitro*. *In vivo*, RVX-208 enhances cholesterol efflux via different pathways and significantly increases serum apoA-I and HDL-C in monkeys.

Appearance: A crystalline solid

Solubility: Solubility in DMSO is 74 mg/ml. Solubility in water and ethanol is <1 mg/ml.

Biological Activity: RVX-208 has been shown to have an IC₅₀ = 0.510 μM for BD2, which is ~170-fold selectivity over BD1.

Storage/Stability: Store at or below -20°C for up to two years.

Quality Control: The purity was determined by HPLC analysis.
