Product Description

CF™ dye-cAMP is a fluorescently-labeled cAMP analog that can be used to probe cAMP receptors. Single molecule imaging of fluorescently labeled cAMP bound to its receptor on the surface of Dictyostelium cells has been reported by Ueda and colleagues (Science 294, 864(2001)). CF™ dyes are Biotium's line of next-generation fluorescent dyes with exceptional brightness, photostability, and water solubility.
