Product Information

Methotrexate Conjugates

Product List

Cat. No.	Conjugate	Ex/Em (nm)	MW
00091	CF@488A	490/516	1435
00092	CF@568	562/584	1234
00093	CF@594	593/615	1249
00094	CF@640R	642/663	1353
00023	Fluorescein, Triammonium Salt	498/517	979

Unit Size: 1 mg

Storage and Handling

Store at -20°C. Protect from light. Product is stable for at least 12 months from date of receipt when stored as recommended.

Prepare the stock solution in DMSO and store at 4°C.

Product Description

Methotrexate is a cytotoxic agent used as a chemotherapeutic and immunosuppressant. It is actively taken up by cells and binds to and inhibits dihydrofolate reductase, thereby inhibiting folic acid metabolism and inducing cell cycle arrest. Methotrexate fluorescein is useful for studying antimetabolite resistance and spontaneous gene amplification. Other dye conjugates of methotrexate may not be transported into cells, but may have other applications for studies of drug binding. Biotium offers methotrexate conjugated to fluorescein and a selection of our next-generation fluorescent CF@ Dyes.

Biotium's next-generation CF@ Dyes were designed to be highly water-soluble with advantages in brightness and photostability compared to other commercially available fluorescent dyes. For more information about CF@ Dyes, please visit our website at www.biotium.com.
